Backboard / MLH	Best Use of Backboard — build a persistent AI experience.	Tile Essentials Pack per winning team member.
DigitalOcean / MLH	Best Use of DigitalOcean — use its cloud or AI services.	Retro wireless mouse.
Snowflake / MLH	Best Use of Snowflake API — integrate its APIs.	Raspberry Pi 4.
GoDaddy Registry / MLH	Best Domain Name from GoDaddy Registry — register a domain through GoDaddy Registry.	Digital gift card.
SpaceXAI	Make it Legendary Space gives you more to work with than almost any other field. You have access to enormous public datasets, decades of missions, and a literature no human can read all of. Real space data goes in and a legendary project comes out. To be eligible, your project must be built with Cursor. The more you use Cursor, the more likely you are to win. You must also use the Grok Imagine or Voice API in your project. Bonus points, if you use Grok Bot for project planning and team collaboration.	4 Cursor keyboards planned for closing ceremony Anyone who submits to our challenge will be entered to win a Cursor Owala water bottle.
OPEF	Environmental Intelligence Track Build technology that helps us understand, predict, and act on environmental systems. Environmental Intelligence (EI) spans the intersection of AI, data science, sensing, earth observation,	\$250 prize to the winning team and internship interviews for the top performing teams.
